To whom it may concern,

I am a student at the West Tisbury School. I play on the mv united 2008-2009 girls soccer team and we have gone to tournaments off island. when we go there sometimes we play on turf. TURF HURTS!! I get turf burns where my skin gets red. Turf is horrible it adds to climate change. And where are we going to put it in the landfill? I don't want you to waste all your money on plastic green things when you could be spending it on more important stuff, for example stop renovating your fields when you could be renovating your school. Think about the poor worms they may not seem like much but they have a life too how would you feel if a big layer of tires and plastic green needles just came over you and crushed your home and your family. You will kill so many ground creatures!!!!. Change those gray pavement floors to something more beautiful so we can be proud of the floor. Or change the colors of the hallways. Do you want your knees to burn and kill the earth? 😞😓

Sincerely, Pickle eville
