To: Oak Bluffs Planning Board <planningboard@oakbluffsma.gov>

To Whom It May Concern,

I am a member of Plastic Free MV (PFMV) and I oppose plastic playing fields at MVRHS. You should not have plastic fields because they contribute to global warming. In the summer when it is hot outside the plastic turf gets really hot and could harm us. There is not a great plan for recycling this plastic turf, either.

I have played on grass fields all my life and I don't want that to change.

So do the right thing and do not make any more plastic fields. Save the World!!!!

Sincerely,

Lucy M.
