APT Project No.: MA599120

Attn: Chairman Andrea Rogers

**Re: Special Permit Application
Oak Bluffs Landfill Proposed Solar Facility
16 Pennsylvania Ave,
Vineyard Haven, Massachusetts**

Dear Chairman Rogers:

On behalf of the Applicant, Greenskies Renewable Energy, All-Points Technology Corporation, P.C. ("APT") is respectfully requesting a continuance of the Oak Bluffs Landfill Solar Facility Public Hearing scheduled for tonight, May 22, 2020. We are requesting this continuance to be able to get a response from the Massachusetts Department of Environmental Protection with regards to the nitrogen credits on Parcel MBLU 29-0-164 ("Parcel"). It is our understanding that there is a deed restriction on this Parcel, that restricts development, and a request for determination from MassDEP that the proposed solar project does not violate this deed restriction has been submitted.

I will be in attendance at tonight's public hearing to formally request the continuance from the Board as well. Please contact me by telephone at (860) 663-1697 ext. 208 or via email at bparsons@allpointstech.com, if you have any further questions or concerns.

Sincerely,

Bradley J. Parsons, PE, PMP
Manager Civil Engineering
