Mr. Adam Turner, Director  
Martha's Vineyard Commission  
PO Box 1447  
Oak Bluffs, MA 02557

Re: Martha's Vineyard Regional High School – Athletic Field Improvements  
(Amended DRI # 352) Athletic Field Use Analysis

Dear Mr. Turner;

During our last staff review hearing for the above referenced DRI application, you requested additional and updated information regarding existing and proposed field use at the Martha's Vineyard Regional High School (MVRHS).

### **FIELD USE ANALYSIS**

To help determine the proper sports surfaces for the existing and proposed athletic fields at MVRHS, HAI reviewed the number of current annual athletic and physical education events held on the high school campus. As this effort was primarily focused on reducing the overuse and compaction of the existing natural grass fields, we did not include numbers for baseball and softball as those sports are primarily impacting the infield areas.

Presently there are five (5) existing natural grass multi-use athletic fields at MVRHS. The plans for Phase One will result in one (1) multi-purpose synthetic turf field, and four (4) natural grass athletic fields at the MVRHS campus upon completion. The summary of annual events held on the high school campus, both existing and proposed, had been provided originally by MVRHS Athletic Dept staff, and updated for this most recent analysis. The most significant change includes the addition of physical education classes currently using the existing athletic fields. The updated spreadsheet is attached as an appendix to this report. The following table (*Figure 1*) shows a breakdown of the existing field usage extended across the existing and proposed athletic fields submitted as a part of the above referenced DRI #352.

The current impact of 1744 events, results in total 3850 annual hours spread across five (5) existing natural grass fields. ***This translates to 770 average annual hours per natural grass field under the existing field configuration.*** If the five (5) fields proposed in Phase one are all to be natural grass, the result would remain at 770 annual hours per natural grass field.

MVRHS - Proposed Athletic Field Use Analysis					
Plan Title	Annual Events	Hours/Event	Total Use Hours	Number of Fields	Annual Hours/Field
<b>Existing Conditions</b>					
High School Sports, Youth Sports & Summer Camps	1,404	2.5	3510		
High School Physical Education Classes	340	1	340		
<b>Total Average Existing Use (per field)</b>			<b>3850</b>	<b>5</b>	<b>770</b>
<b>Phase One - Proposed Field Improvements (All Natural Grass)</b>					
High School Sports, Youth Sports & Summer Camps	1,404	2.5	3510		
High School Physical Education Classes	340	1	340		
<b>Total Phase One Use - Five (5) Natural Grass Fields</b>			<b>3850</b>	<b>5</b>	<b>770</b>
<b>Master Plan Alternative - Use of Synthetic Turf</b>					
<b>Phase One - Stadium Field - One (1) Synthetic Turf Field</b>					
High School Sports, Youth Sports & Summer Camps	586	2.5	1465		
High School Physical Education Classes	340	1	340		
<b>Total Phase One Use - One (1) Synthetic Turf Field</b>			<b>1805</b>	<b>1</b>	<b>1805</b>
<b>Total Phase One Use - Four (4) Natural Grass Fields</b>	<b>818</b>	<b>2.5</b>	<b>2045</b>	<b>4</b>	<b>511</b>

\* Does NOT include 848 annual events associated with MV United, and 84 annual events associated with adult leagues.

Figure 1 – Existing Athletic Field Use Analysis

As you are aware, our Phase One proposal includes the use of a synthetic turf surface inside the new 400m track. In working with the MVRHS Athletic Dept staff, we have provided a twelve-month schedule which allows for 1805 hours of use to be shifted to the one synthetic turf field at the proposed stadium. The result is that the remaining 2045 hours are spread across the remaining four (4) natural grass fields producing an average annual use of 511 hours of play on each of the remaining natural grass fields. This analysis is intended to help the owner, and the MVC, understand the impact of introducing one (1) synthetic turf surface.

Figure 1 shows that the introduction of one synthetic turf surface would drop the annual hours per remaining natural grass field to approximately 511 hours per year. ***This represents an average reduction of approximately 259 hours of play to all four remaining natural grass athletic fields.***

The Sports Turf Managers Association (STMA) recommends that a well-maintained natural grass field can support a maximum of 680 to 820 hours of use per field annually. The range of 680 to 820 annual hours is dependent upon the geographic location of the field. Fields in the South and Southwest can expect a top range of 820 hours of use per year. This is based upon the fact that the growing season is much longer in those southern climates as compared to the North and Northeast regions of the United States. The number of 680 hours is predicated upon optimal soil and micro-climate conditions, and limited use during the months of March and April.

In New England, and specifically at MVRHS, the lacrosse season starts in March. At that time, although the grass may be green, it is dormant and the topsoil is often frozen. Activity associated with lacrosse includes quick starts and stops on the athletic field grass. The result is the grass blades are often ripped from their frozen roots during early season play. Continued play throughout the spring aggravates this condition and the field is often not able to recover to a playable condition. Shifting that early season use to the other natural grass fields on campus will

only result in damage to those fields, expanding the problem and increasing the overall cost for repair and maintenance. By moving that early season play to a synthetic turf surface you can better protect your natural grass fields at the MVRHS campus. The result is an improved natural grass surface on all four of the remaining athletic fields. ***This is reflected in the reduction from 770 hours to 511 hours of play as shown in table #1.***

Give the results of the above study, our recommendation remains that MVRHS would benefit from the introduction of at least one synthetic turf surface.

Sincerely;  
Huntress Associates, Inc.
