I am a homeowner in Martha's Vineyard. One of the most compelling reasons I choose to live here is because of the natural beauty and clean air and water throughout the island.

The Land Preservation Society has made a conservative and costly effort to maintain the health and natural beauty of the island with each property owner's participation.

I am very much against your proposed plastic turf installation for the MVRHS. It is a blatant effort to go against everything Martha's Vineyard stands for.

People and organizations all over the world are trying hard to find ways to eliminate plastics from our environment because we all know the dangers plastic materials brought to our earth compromising the health of humans, animals, oceans, etc.

Please don't do this🙏🙏🙏!!!
