To: Oak Bluffs Planning Board <planningboard@oakbluffsma.gov>

Good Morning,

I'm writing to register my opposition to the idea of installing Plastic Turf on the grounds at the High School. While I understand the theory that the plastic would last longer, my belief is that the overall damage to the environment, the water table, the negative effect aesthetically would outweigh the benefits of the life of the turf. The hot sun on the plastic come warmer weather?? Is this what you want our children to be inhaling?

The idea of a kid scraping his/her knee on the plastic turf doesn't appeal to me either. Natural grass would be much more forgiving.

This does not make sense to me on any level. We are already hounded by the negative effects of too much plastic in our environment. Let's not add more to it and on such a large scale!

Sincerely,

Fala Freeman
