Oak Bluffs Planning Board

I have been involved with the attempt to improve the MVRHS playing fields for the last eight years.

1, In that time the opposition has not produced one piece of independently vetted evidence to show why this project should not be built.

2. The project has been presented to the six towns, five supported the MVRHS school board to proceed with the process.
3. The MVC has held eighteen months of meetings and reviewed over 80,000 pages of information before approving the project.
4. Horsley-Witten, the environmental engineering firm the MVC hired to review the project found no reason to oppose the project.
5. Tetra Tech, the testing lab who reviewed the materials proposed for use in the field found no issues with the materials.

Our island kids have been forced to play on unsafe fields while the supposed adults continue this debate.

I am asking the Oak Bluffs Planning Board to review the evidence and vote to approve the MVRHS Plan and allow us to give our kids the playing fields they deserve.
