To: Oak Bluffs Planning Board <planningboard@oakbluffsma.gov>

I just read the excerpt from the MV Commission's report. I don't understand the intransigence of those who continue to fight for plastic in the face - and intelligent reporting - of the **detriments**. Why? **Plastic is not progress**. OMG haven't we spoken enough about the environment? Someone has to stop! It's not the "other" person's responsibility. Stop throwing away money chasing what already is bad news - nationally and internationally!

It's grass! It's a kids' playing field! Whatever you've done for 100 years do better. You have the power, the knowledge and resources to "fix" what we have. Make SENSE of this.

One of the kindest things you can do for others is to cheer them up.
